Personal Profile

I am front-end developer with 2 year of experience in designing web applications according to client briefs and modify designs to meet changes in client specifications.

Develop web products by coding wireframes into elements that users can interact with.

Work in a team of web designers, back-end developers, and UX designers to meet project goals and create effective user experiences with digital products.

Use skills in debugging to check code, improve code and enhance the functionality and user experience of web applications.

Supervise junior developers, provide training and motivate team members.

Educational Training

- Bachelor of Engineering - EXTC (2019) from Mumbai University with 6.5 CGPA
